## 4 Troubleshooting

### 1. **slow initial boot for MID**

After system upgrade of MID, initial boot needs installation of the pre-installed software applications, and for about 2-3 minutes, it runs faster.

### 2. **MID can not be connected to WIFI**

- Ensure that the wireless router providing the network services works properly.
- Ensure the MID and the wireless router are kept with certain distance, and between which no wall or other obstacles exist.
- Ensure the user name and the password are correct

### 3. **MID feels hot**

When multiple applications are running at the same time, or the screen is adjusted to the brightest, or it is recharging, this situation is normal.

### 4. **System is disordered and does not work properly**

Installation of some third-party applications may lead to system failure, and you can press the reset button to reset the system.

### 5. **Unable to create e-mail or regist applications**

- Ensure your network is properly connected to the Internet.
- Ensure the e-mail is set up correctly.
- Ensure your system time and the local time are consistent.

Caution: Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.
